2. COMPANY PROFILE

DISTILLOGIC TECHNOLOGIES is a software engineering and technology delivery company supporting enterprises, system integrators and technology organisations with software development, integration, modernisation, cloud, data, AI, quality engineering and application-management requirements.

DISTILLOGIC can participate in engagements including:

- complete software projects;
- defined work packages;
- application modules;
- dedicated engineering teams;
- engineering squads;
- specialist technical capacity;
- subcontracting;
- application management;

managed technical services.

3. CORE SERVICE CAPABILITIES

Software Engineering

Enterprise applications, backend systems, frontend applications, portals, APIs, microservices and mobile applications.

Systems Integration

Enterprise APIs, platform integrations, third-party systems, middleware and event-driven architectures.

Application Modernisation

Legacy modernisation, refactoring, architecture improvement, technology migration and cloud readiness.

Cloud & Platform Engineering

Cloud infrastructure, DevOps, CI/CD, containerisation, Infrastructure as Code and platform engineering.

Data & AI Engineering

Data pipelines, integration, analytics, machine learning, LLM integration, RAG and AI-enabled applications.

Quality Engineering

Manual and automated testing, API testing, integration testing, regression testing and release validation.

Application Management

Maintenance, enhancement, production support, upgrades and continuous technical improvement.

Technology Delivery

Full projects, work packages, application modules, engineering teams and specialist technical delivery.

4. DELIVERY MODELS

DISTILLOGIC supports:

Full Project Delivery

Work Package Delivery

Application Module Delivery

Dedicated Engineering Teams

Engineering Squads

Staff Augmentation

Time & Materials

Fixed Scope / Fixed Price

Application Management

Managed Services

Subcontracting

Tender Subcontracting

Framework / Call-Off Delivery

Delivery Partnerships

Remote, Hybrid and Onsite Delivery

5. DELIVERY GEOGRAPHY

Primary Operating Location

Patras, Greece

Primary Market

European Union

DISTILLOGIC may support international engagements subject to:

- contractual requirements;
- resource availability;
- applicable law;
- data-location requirements;
- travel requirements;

security requirements.

6. OPERATIONAL PRESENCE

DISTILLOGIC operates from Patras, Greece.

The operating model supports:

- engineering collaboration;
- project coordination;
- management activities;
- client meetings;

company operations.

Bank details should be independently verified through an authorised DISTILLOGIC contact before the first payment.

Any requested change to bank details should be verified through a separate authorised communication channel.

10. STANDARD COMMERCIAL TERMS

Unless otherwise agreed for a specific engagement:

Currency

EUR (€)

Standard Payment Term

Net 30

Taxes

Prices are normally stated exclusive of VAT and applicable taxes.

Billing

Depending on engagement:

- monthly;

- milestone-based;
- mobilisation + milestones;
- monthly dedicated-team fee;
- retainer;

Time & Materials.

Rate Validity

Commercial quotations normally remain valid for:

30 calendar days

unless otherwise stated.

11. PURCHASE ORDERS

Where the Client's procurement process requires a Purchase Order, DISTILLOGIC normally requires an approved Purchase Order or equivalent written commercial authorisation before material billable delivery begins.

Invoices may reference:

- Purchase Order number;
- SOW reference;
- project reference;
- billing period;
- milestone;

approved timesheets.

12. TAX & INVOICE INFORMATION

Invoices may include:

- legal entity name;
- registered address;
- VAT number;
- invoice number;
- invoice date;
- Client legal entity;
- Client VAT number;
- Purchase Order reference;
- SOW / project reference;
- service description;
- billing period;
- applicable rates;
- taxes;
- total amount payable;
- due date;

IBAN / banking information.

Any Client-specific invoicing requirements should be communicated before the first invoice.

13. ENGINEERING CAPABILITY

DISTILLOGIC structures engineering capability across disciplines including:

Software

Solution Architects

Technical Leads
Backend Engineers
Frontend Engineers
Full-Stack Engineers
Mobile Engineers

Cloud & Platform

DevOps Engineers
Cloud Engineers
Platform Engineers
Site Reliability Engineers

Data & AI

Data Engineers
AI / ML Engineers
Data Analysts
BI Specialists

Quality & Delivery

QA Automation Engineers
Software Test Engineers
Project / Delivery Managers
Business Analysts
Product Owners
UI / UX Specialists

Detailed technical profiles are available according to specific project requirements.

14. TECHNOLOGY COVERAGE

Application Engineering

Java · Spring Boot · C# · .NET · Node.js · TypeScript · Python · React · Angular · Next.js · Vue.js

Cloud & Platform

Microsoft Azure · AWS · Google Cloud · Docker · Kubernetes · Terraform · CI/CD

Data & AI

Python · Data Engineering · ETL / ELT · Machine Learning · LLM Integration · RAG · AI Agents

Data Platforms

PostgreSQL · SQL Server · Oracle · MySQL · MongoDB · Redis · OpenSearch

Integration

REST · GraphQL · gRPC · Kafka · RabbitMQ · OAuth 2.0 · OpenID Connect

Technology selection is adapted to the Client's project and architecture.

15. INFORMATION SECURITY

DISTILLOGIC maintains an engineering and information-security framework addressing areas including:

- identity and access management;
- least privilege;
- source-code security;
- private repositories;
- code review;
- credentials and secrets management;
- environment separation;
- secure development practices;
- backup and recovery;
- logging and monitoring;
- incident management;
- vulnerability management;

Client information protection.

Detailed information is available in:

DISTILLOGIC Engineering & Information Security Practices — DL-SEC-001

16. SECURITY CERTIFICATIONS

DISTILLOGIC shall only represent certifications that are valid and actually held.

Current Certifications

NONE CURRENTLY CLAIMED

No ISO, SOC, PCI or other formal certification should be inferred unless expressly confirmed in writing.

17. DATA PROTECTION

DISTILLOGIC supports compliance with applicable data-protection requirements within the scope of its contractual responsibilities.

Where DISTILLOGIC processes Personal Data on behalf of a Client, the Parties may execute a:

Data Processing Agreement

Reference template:

DL-DPA-001

Project-specific Processing details, Subprocessors and international transfers are documented where applicable.

18. CONFIDENTIALITY

DISTILLOGIC can operate under:

- its standard Mutual NDA;
- Client NDA;
- project confidentiality provisions;

MSA confidentiality provisions.

DISTILLOGIC's standard Mutual NDA reference is:

DL-NDA-001

19. INTELLECTUAL PROPERTY

Project-specific intellectual-property arrangements are defined in the applicable:

- Master Services Agreement;
- Statement of Work;

commercial agreement.

As a general principle:

- each Party retains its pre-existing intellectual property;
- project-specific rights are defined contractually;

third-party and open-source components remain subject to their applicable licences.

20. INSURANCE

Professional Indemnity / Errors & Omissions

Expiry: TO BE VERIFIED

Only insurance actually maintained by DISTILLOGIC should be stated as active.

21. BUSINESS CONTINUITY

DISTILLOGIC maintains reasonable operational-continuity practices appropriate to its business and project responsibilities.

These may include:

- cloud-based collaboration;
- controlled remote-working capability;
- source-code repositories;
- backup arrangements;
- documented technical processes;

alternative communications.

Specific RTO, RPO or formal Disaster Recovery commitments apply only where contractually agreed.

22. SUBCONTRACTORS

DISTILLOGIC may use appropriately qualified:

- employees;
- contractors;
- consultants;

approved subcontractors

according to the applicable project model.

Where subcontractors access Client Confidential Information, appropriate confidentiality obligations apply.

Where a Subprocessor processes Client Personal Data, the applicable DPA requirements apply.

23. QUALITY & DELIVERY GOVERNANCE

DISTILLOGIC engagements may incorporate:

- defined project responsibilities;
- project governance;
- status reporting;
- technical reviews;
- code review;
- testing;
- release controls;
- risk tracking;
- issue escalation;

change control.

The exact governance structure depends on project scope and complexity.

24. COMPLIANCE DECLARATIONS

DISTILLOGIC is committed to conducting business in compliance with applicable laws and contractual obligations.

The company supports appropriate controls regarding:

- anti-bribery;
- anti-corruption;
- conflicts of interest;
- sanctions and export restrictions;
- confidentiality;
- data protection;
- intellectual property;

ethical business conduct.

Client-specific compliance requirements may be reviewed during supplier onboarding.

25. ANTI-BRIBERY & ANTI-CORRUPTION

DISTILLOGIC does not knowingly permit:

- bribes;
- kickbacks;
- improper facilitation payments;

unlawful inducements

in connection with its business activities.

Personnel and representatives are expected to comply with applicable anti-bribery and anti-corruption laws.

26. CONFLICTS OF INTEREST

DISTILLOGIC shall use reasonable efforts to identify material conflicts that could affect an engagement.

Any material identified conflict should be disclosed and appropriately managed.

27. SANCTIONS & EXPORT CONTROLS

DISTILLOGIC shall not knowingly undertake an engagement that would violate applicable sanctions or export-control requirements.

Project-specific restrictions should be identified during contractual review.

28. BENEFICIAL OWNERSHIP / UBO

Where required for Client KYC or supplier onboarding:

Ultimate Beneficial Owner(s):

TO BE VERIFIED - CONFIDENTIAL

Additional ownership documentation can be provided where legally required and appropriate.

Sensitive personal identification documents should be exchanged through secure channels only.

29. CORPORATE OWNERSHIP

Parent Company / Group

TO BE VERIFIED

Subsidiaries

TO BE VERIFIED

Trading Names

DISTILLOGIC TECHNOLOGIES

Other: TO BE VERIFIED

30. EMPLOYEE / RESOURCE INFORMATION

Personnel information supplied to Clients is limited to what is reasonably necessary for:

- project evaluation;
- onboarding;
- technical assessment;

contractual compliance.

Client-facing CVs should generally exclude unnecessary personal information.

Engineering profiles may be supplied using structured DISTILLOGIC profile IDs.

31. REFERENCES & EXPERIENCE

Client references, case studies and project details shall only be provided where:

- factually accurate;
- authorised for disclosure;

consistent with confidentiality obligations.

DISTILLOGIC shall not claim another company's project as its own delivery.

Where individual team members have relevant previous experience, such experience may be identified as:

Individual prior professional experience

where appropriate.

32. DOCUMENTS AVAILABLE FOR VENDOR ONBOARDING

Subject to applicability and confidentiality, DISTILLOGIC may provide:

Company Registration / GEMI documentation

VAT registration information

Bank account confirmation
Tax documentation
Corporate Presentation
Capability Statement
Rate Card
Mutual NDA
Master Services Agreement
Statement of Work
Data Processing Agreement
Engineering & Information Security Practices
Insurance certificates
ownership / UBO information
engineering profiles
other reasonable supplier documentation.

33. CLIENT-SPECIFIC QUESTIONNAIRES

DISTILLOGIC may complete reasonable Client:

- supplier questionnaires;
- security questionnaires;
- data-protection assessments;
- procurement forms;
- compliance questionnaires;

financial onboarding forms.

Responses shall reflect actual company practices and capabilities.
